

# Here's What Our Customers Have To Say:

"CR Construction is presently working on the Hot Metal Track (Blast Furnace of BOF). During the past 20 years, they've also worked in various other parts of our plant. From our past experience, CR's track record has been on time and on budget. We'd definitely work with them again because of the quality of workmanship, customer satisfaction, price and willingness to adapt."

**Charles R. Nochta, Jr.,** *General Yardmaster,*  
WCI Steel, Warren, Ohio

"CR constructed new tracks for our scrap processing area. The initial track layout on paper didn't fit once the site was surveyed. The folks at CR provided suggestions to adjust the track layout. The switch stands ordered didn't meet specs, but they were able to replace them without delaying the project."

"They reviewed the scope of our project thoroughly in order to provide the customer with a quality and economical job."

**Dave Wozniak,** *Manager RR Engineering and Maintenance,* Mittal – Cleveland Works Rly. Co.

"CR Construction performed specified tie and rail changeouts for MDOT in Indiana and Ohio, and some of the improvements required special construction methods. CR Construction was very accommodating. The company was willing to work with us during critical points in the project – particularly in the design stages, so we avoided pitfalls later. CR Construction is an easy company to work with and both of our companies have developed a good relationship. The project was completed on time and within specified budget constraints."

**Troy Strane,** *General Manager,*  
Indiana Northeastern Railroad
